fast2web D7

features list

fast2web D7

Fast2web D7 is a powerful and comprehensive solution for the creation, maintenance and hosting of websites. It is based on the open source content management system Drupal 7 and has been developed with attention to simplicity, usability and speed of implementation.

Fast2web D7 offers a long list of features ready to use. Some are generic functionalities, others have been developed specifically for Fast2web D7. The following list provide a brief summary of the features available.

Belgian e-gov features

Fast2web D7 was build to be compliant with the Belgian federal e-government requirements. Easily activate the Belgian electronic identity card login or add the federal header to your website.

Design and responsive theme

Within Drupal, functionalities are set into blocks. Imagine the perfect design for your website. Fast2web D7 is a flexible solution as you can set the blocks as you wish. The appearance of your website will automatically adapt depending on the device your visitor use to visit the website (mobile, tablet or desktop).

Multilingual

Your visitor can navigate the website in French, Dutch and English. Other languages can be added. Managing the translation of the content you created is very intuitive.

Accessibility

Fast2web D7 has been build to comply to the AnySurfer requirements. AnySurfer strive for a more accessible Internet for all users, including those with a disability. (e.g. the visitor can change the font-size of texts, keyboard navigation is enabled, all images allow a textual description,...).
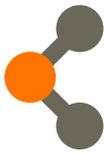

Categorization of content

Ease the navigation for your visitors by regrouping your content in categories using the Taxonomy feature of Drupal 7.

Search engine optimization

Fast2web D7 is optimised for search engine robots using a sitemap, easy to read URL aliases, page descriptions, meta-datas, etc.

Share and interactivity

You may activate user comments. Monitor your visitor's comments through an easy to use interface. Spread your content easily using the Rss feature.

Content manager help

Fast2web D7 uses a very intuitive content management system. No need to be a genius in IT to manage your content. At anytime you can download the user guide for more in depth help.

Newsletter subscription

Fast2web D7 is integrated to the Addemar newsletter management software. Your visitor can subscribe easily by filling a form on your Fast2web D7 website and you can manage your users, groups and campaigns within Addemar.

Easy navigation

Navigating the website is very intuitive with menus, a sitemap and a breadcrumb. The breadcrumb allows users to keep track of their locations within the website navigation

Member area

You can create a member area within your Fast2web D7 website only accessible with login and password or with the Belgian identity card.

Advanced search

Your website can be searched using the faceted search feature, using the Solr technology. Faceted search allows users to explore a collection of information by applying multiple filters (e.g. a news article published between March and April).

Comprehensive analytics

Fast2web D7 is integrated with Waia, an easy to use tracking engine. Using a browser based interface, you can track your visitor behaviours and collect a wide collection of data's.

Roles and permissions

Delegate the management of your website within your team. You can set different types of administration permissions: The Content Manager is responsible for the texts, the medias and the translations; the User Manager can add users, change their permissions or delete depreciated users; the Configurator is the owner of the website and has extended permissions.

Workflow

The notification feature allows e-mail notification when content has been created or edited. The revision feature let you revert to previous versions of a content. For each content you created it is possible to preview it before you publish it.

Easily create and edit content

No need to be an IT expert to create, edit or delete your content. Drupal uses a WYSIWYG (What you see is what you get) editor, you can easily copy paste texts from word, add pictures in a news item, decide when to publish your content (directly or delay the go live to a later date) and you can manage the translations in one place, etc.

News
Update your website regularly with news items.
